PEAK Launches nVidia GTS250 Graphics Cards

4th March 2009

PEAKHARDWARE International Co., Ltd. (PEAK), one of Taiwan's leading suppliers of flash memory, VGA cards and related computer peripherals, today releases its new graphics cards series, the nVidia GTS250. This new PEAK series is powered by the new GTS250 GPU with up to 2GB DDR3 embedded memory. Equipped with D-sub, DVI and HDMI outputs, these new cards will satisfy the different requirements.

The GPU clock speed of PEAK GTS250 series can reach 745MHz and the extreme RAM clock speed of 1000MHz; an amazing leap forward in video processing performance. It also supports displays up to 2560x1600 resolution with D-sub, DVI and HDMI outputs. The PEAK GTS250 cards use the latest PCI Express 2.0 interface, allowing up to twice the throughput of PCI Express 1.1. The built-in native NVIDIA SLI™ technology allows two graphics cards to be used in a single PC, increasing graphics performance up to 2x.

PEAK's Product Manager, Albert Tung, said, "The PEAK GTS250 series allows users to experience the amazing visual effects and enhanced interactive game processing provided by the advanced technical features incorporated into these outstanding cards. The PEAK GTS250 is available in 512MB and 1GB DDR3 embedded memory and we are going to release a 2GB model soon."

PEAK produces both nVidia and ATi graphics cards. For full details of all PEAK graphics cards, please visit our website: www.peakhardware.com.
