PEAK Launches New USB Hub

27th October 2009

PEAKHARDWARE International Co., Ltd. (PEAK), one of Taiwan's leading suppliers of flash memory, VGA cards and related computer peripherals, today announces its new USB Hub. This 4-port USB Hub provides USB 2.0 high-speed data transfer rate and is backward-compatible with USB 1.1 devices. The red LED power indicator lights up during operation and an optional external power adapter is included.

“PEAK's new USB Hub has a matt finish with black and white decor; its compact size makes it easy to carry and its stylish design really stands out,” said Albert Tung, PEAK's Product Manager. “The new USB Hub has an external power adapter for optional use when needed. The USB Hub can work without external power, but for users who connect high power consumption devices, as hard drives, printers and IP conference cameras; we recommend to use the power adapter to keep those devices working properly. Generally, the Hub can support 500mA for each port with the power adapter, sufficient for all types of USB devices.”

The PEAK USB Hub can function without driver installation and it supports Linux, Mac and Windows OS. The USB Hub has passed the RoHS, CE, FCC and WEEE certificates and carries a one year warranty. PEAK has redesigned its accessory packaging with red-and-white product identification to match its corporate logo. PEAK's other products include flash cards and flash drives, graphics cards and networking products. For more product information, please visit our website: www.peakhardware.com
