## **PEAK Launches PEAK III 16GB and PEAK Slider 16GB Flash Drives**

4<sup>th</sup> March 2008

PEAKHARDWARE International Co. Ltd. (PEAK), one of Taiwan's leading suppliers of computer components, peripherals and related hardware products, launches another two high-capacity flash drives: the PEAK III Flash Drive 16GB and the PEAK Slider Flash Drive 16GB. They are perfect for users who need to take huge numbers of files with them.

The PEAK III Series and PEAK Slider Series of flash drives have been winning a great deal of praise for their function and look since they were released. PEAK, meeting users' increasing need for higher capacity flash drives, releases the high capacity 16GB PEAK III and 16GB PEAK Slider drives simultaneously. The PEAK III has a black finish with a special cap designed to avoid cap loss and it has a compact size for easy carrying. The flat design of the PEAK Slider, with its smooth mirrored housing in two contrasting materials, fits in with the latest fashionable trends. Moreover, its cap-less design prevents users from losing the cap.

PEAK III and Slider Flash Drives 16GB use the latest USB 2.0 specification, supporting both USB 1.1 and 2.0 standards and are compatible with the USB ports of most hosts. Their read/write speeds can reach at least 16 Mb /5 MB and 14 MB/5 MB per second respectively, enabling data transfer in seconds. Furthermore, they are designed with a LED indicator for data access.

PEAK III Series and PEAK Slider Series are now available in capacities of 1GB, 2GB, 4GB, 8GB and 16GB.
